FORUM,
Bombay.

Dear Shri Dravid,

pp1-3

On the 6th September last both my wife and I addressed you a telegram from Siddapur after personally examining the shocking conditions of the Sirsi Kodkani road. We had requested you to put these matters right and also to attend to the case of electrification of the Siddapur town. Yet we have received no acknowledgment of the telegram sent to you on the 5th September last. Shri Motensar.Hegde, the local M.L.A. at Sirsi also supported our demands.

I may state here that telegrams sent to the Government of India in regard to other conditions of the district have been promptly acknowledged. The steamer which did not stop at Bhatkal is now being stopped once a fortnight on our representation to the Govt. of India sent from Bhatkal.

You are aware that the state of communications in North Kanara district is in a most backward condition. We have been pressing the authorities to redress the grievances of the public therein. Please let me know what you have done in this matter and oblige.

I am also enclosing herewith a copy of our telegram for your information.

Yours sincerely,

Shri Dravid, I.C.S.,
Secretary, Public Works Dept.,
Secretariat,
BOMBAY.

Subject : Electricity to the town of Siddapur
the supply of.....

Dear Sir,

The news that our Government was going to utilise in the State the electricty produced in the Mahatma Gandhi Hydro-electric Generating Station at Jog Falls had engendered a feeling of great satisfaction and jubilation among the people here. There had been continuous and insistent clamour by the people here, ever since electric power began to be produced at Jog, that this District particularly this taluka should be supplied the power produced at so near a place. Jog Falls is only at a distance of ten miles from here.

The Government in furtherance of its plan has conducte survey as regards the line the power to be taken through and materials for its comstruction are being heaped here. While we were watching this development with great expectation we received a great set back. A recent news revealed that we were under a great illusion in thinking that our town would be illuminated by electric lights in the near future. It is learnt that this town is not going to get power supply after all. It is a cruel irony that this town should be deprived of the benefit of electricity although it is produced at so near a place and passes through this very town to other places. We are really surprised at the decision of the Govt. We do not understand the reason behind it. There is no sense in the argument that the consumption of electricity in this town will be too low to undertake the costly fittings. This town has a population of more than 5000 and there are three rice and oneflour mills running here and some new industries can be expected to come into being if the power is provided. And mroeover the people's Govt if its aim is public weal and welfare should not think simply in terms of immediate profit and loss. We beg to submit that even considering purely from the economic point of view the Govt will not incur any loss by providing electricity to this town. Although the work of stepping down of the electricty and the necessary fittings may involve an initial expenditure, we are sure, in the long run that will not only be recovered but the Govt. will get ample returns. In the neighbouring State of Mysore the Govt has provided the power even to such small villages as having barely a population of less than 250 provided that the villages are situated in places through which the line has passed. But in our own State the ideas of the Govt. seem to be contrary to that. One can hear the people remarking here referring to the electric posts erected nearby, that our Govt. deserves to be warmly congratulated though not for providing elctric power to the town at least for providing a good means for committing suicide by catching the electric wires. This remrk contains as much truth as satire. Therefore we most respectfully urge upon you to revise the earlier decision and order that the power should be supplied to this town also.

See. P.W.D. 11/14/52

Yours sincerely,

Siddapur. (N.Kanara)

Subject:- Jog Power Supply to Siddapur.

Reference:- G.L.No. NS 96/94276 K dated 17th October 1952. P-7

The proposed transmission line from Jog to Hubli which will pass very near Siddapur will be of 110,000 Volts from which direct supply cannot be given to this town. For supply to this town, an 11,000 Volt line will have to be run from the nearest 110,000/11,000 Volt sub-station which will be at Sirsi. Siddapur is not included for supply in the first stage of development on account of poor load potential.

Moreover all the available power from Jog has been fully earmarked for supply to various industries, licensees and rural consumers, and there is no surplus power available at present for supply to any new loads. Supply to ~~your~~ this town can, therefore, be considered only after more power becomes available from Mysore Government and it is found economical to supply ~~your~~ this town from the nearest sub-station. Further, as supply to this town was not included in the original scheme as sanctioned by Government, additional funds will have to be sanctioned by Government for giving the supply to ~~your~~ this town.

Below is a translation of a representation addressed to M (I&D) by the farmers and all the other villagers of Guttala village, Haveri Taluka, Dharwar Dist.

Our humble application is — that the eastern part of our taluka is being constantly subjected to famine for want of rain. Our villagers are mostly farmers. As there is no opportunity to take up any other profession, the labourers and the middle class people have to undergo the sufferings of famine conditions.

2. Govt. had set up a water-lifting engine beside Tancharagatti-Staralahalli river (which is now Tungabadhra river) in order to help the villagers to irrigate their fields. But now it is heard that with a view to complete the Tag-Eleey. Scheme, Govt has given up this scheme. The Tungabadhra and the Varada rivers flow through our taluka and if the scheme of electric supply is completed that will create an opportunity for the improvement of the farming and promotion of village industries. Moreover, it will give an encouragement for the increase in the production of food grains in these da-

food grain shortage. Besides it will also reduce our dependency on rain and ~~help~~ helpto escape from our subjection to famine

3. Now we hear that Govt. proposes supply elecy ~~to~~ from the Jog Scheme to all the towns and villages of Ranebennur or Byadagi Mahal. There is also a thicle rumour that in our Taluka only Haveri village is going to be electrified - Govt. should not do so. Elecy. Should be supplied to all the villages of our taluka too. As there is a wide area of garden or irrigated lands in our taluka, supply of elecy would very much help the people. There are a number of weavers in our village, and supply of elecy would enable us the villagers to create for themselves some subsidiary work - It is therefore most humbly requested that Govt. Should please supply us electricity from the Jog Scheme.

Below is an English translation of a representation addressed to M (PWD) by the farmers of Mantanakeeda and Hombalti villages of Hangalla Taluka, Dharwar Dist.

We desire to set up a lift irrigation scheme at the Dharma river by making use of electricity from Jog Falls. El. power supply has been sanctioned to Kadachippi village which is 2 — 2½ miles away from our villages. In our two villages there are 400-450 acres of irrigated lands. It is therefore requested that power should please be sanctioned from the Jog Scheme for the lift irrigation scheme in our villages and necessary overhead line should also please be laid by Govt. A plan of irrigated lands is attached herewith.

Below is a translation in English of the representation addressed to the Minister (Portfolio not mentioned) of Govt. of Bombay by the farmers of Yadaguda, Hukkeri Taluka

---

The El. Grid Dept. is to supply electricity from Hukkeri to Chikkodi. But our village, which is on the way from Hukkeri to Chikkodi has an area of about 300 to 400 acres which is being irrigated from well water. In order to pump up water from these wells, the El. Grid Dept should supply us electricity. There are 50 wells and the owners of these wells are agreeable to use electricity for pumping up water. We are prepared to give any further information that may be necessary in this connexion.

Electric Grid Offices,
Mercantile Bank Building, Fort,
Bombay 1: 12th December 1952.

To

The Secretary to Government,
Public Works Department,
Bombay.

Subject:- Request for supply of electricity.

Reference:- Govt. Memo P.W.D.No. NS 96/107326-K P-7
dated 2-12-1952.

With reference to the above Government Memo. I have to state that the village Yadguda has not yet been surveyed and therefore no load data is available in this office. As electrification of any villages other than those already sanction-ed by Government will be as extensions of the sanctioned scheme, I suggest that consideration to electrification of any such places may be given after the works already sanctioned are executed and the supply is commenced to all approved villages.

A copy of the above Government Memo. P-9 is returned herewith along with the application.

Chief Engineer.

Translation. 279

To

Hon'ble Minister for P.W.D. &
Electricity to the Government of Bombay,

Application by the people of Hasaritte Village, Haveri Taluka

Respected Sir,

Of late we have heard that you are supplying Jog-falls Electric Power to Haveri Taluka, Renebennur Taluka, Byadagipeth of Dharwar District. Among the villages on eastern side of Haveri Taluka Hasaritte village is the Centre and also commercially very important. In addition to this, every year in the month of Pushya, there is a very big car-festival of Guddali Swamy. In this period, for about a month, there will be a cattle show. There are 140 hand looms. The river Varada is very near this village on the northern side. The following important villages are on a high level on the bank of this river.

(1) Agasanamatti. (2) Ramapura. (3) Konanatambagi. (4) Hiremaralahalli. (5) Chikkamaralahalli. (6) Helmari. (7) Handiganur. (8) Kesaralli. (9) Mannura. (10) Chennura. (11) Koradura. (12) Hasaritte. (13) Attura. (14) Kittura. (15) Maradura. (16) Kodabala. (17) Marola. (18) Halagi. (19) Gudura. (20) Belavagi. (21) Niralagi. (22) Mevunda. (23) Gulagandi. (24) Teredahalli.

Besides, there are good cultivable lands on both sides of the river. Due to insufficient rain, though there are good cultivable lands, it has almost become useless. In these days when there is acute shortage for food, water should be provided in plenty to the lands by means of machinery for which electrical power is required. So electrical supply should be given for irrigation purposes to grow more food. Considering this as the duty of the Government, it should provide supply of electrical power for the above said purpose.

As written above, in Attur, one of the villages on the bank of Varada, 2 water lifting engines have been installed - one or two years back. If electric supply is provided for this, water can early be lifted for irrigation purpose.

In Hosaritte village, the centre of all the village

P.T.O.

electrical supply should be provided for the above said 140 Handlooms.

In half the number of villages mentioned above, there are flour mills. For these also power supply should be given for the benefit of the public.

During the one month festival period, about 200 shops will be opened, 4 to 6 Drama, Cinema, Circus Companies will come. If power is supplied for them also, it will be of great help.

Besides, there will be a collection of 20000 cattles in Agasanamatti. Power supply to this place is also very welcoming. This village and also the connecting village Koradur have 500 and 250 houses respectively. For these two villages also electrical supply should be given for domestic purposes.

Considering all these above facts, we request the Hon'ble Minister to provide Electric Power supply to Masaritte village on the eastern side of Haveri Taluka.

Yours faithfully,

Dated 12-9-1952. Sd/-----

Forwarded thro' the President, Hosaritte Village Congress Committee.

As mentioned above in the application, the villages on the bank of Varada river, should be provided with electric power for irrigation. By doing so, I have no doubt that 65 to 70 villages on the eastern side of Haveri Taluka will be saved from the problem of acute shortage of food.

My opinion is that first preference should be given for the supply of power to agricultural purposes, and then later to the industrial and flour mills demands.

Sd/-----
(M.R.Rachenayak),
President,
Congress Committee
Hosaritte Village.

Dated 17-9-1952.

To

The Hon'ble Prime Minister,
Bombay Presidency.

Sub:- Transmission of Gerusappa Electric Power upto Gadag.

Hon'ble Minister,

We the people of Savanur gram, Bankapur Taluka, Dharwad Dist. beg to submit the following desires and expectations for your kind consideration.

We understand that the Government will be transmitting in the near future the power generated at Gerusappa to Gadag via Hangal and Hubli. There is no doubt that this idea which has been thought over is a great one and is of great necessity to the people. But it will not be of much use if this scheme is carried out as per the proposed plan via Hubli because there are no big towns on the way which will make much use of electric power. Hence the electric power may be transmitted via Shirshi, Hangal, Bankapura, Savanur, Laxmeshwara and Mulgunda i.e. along the pala Badami Road which will help many villages. In the neighbourhood of the pala Badami Road, there are many small and big villages. There are no such important and big villages along the Hubli Road.

Savanur was once a capital of a state. The importance of the city is very much. If this has to be maintained, there should be great encouragement to agriculture, the main profession of the people. The population of this town is above 16,000 and there are 8 floor mills, two gin factories and one screening factory. There are 240 acres of garden and many other cultivate wetlands. There is a big irrigation tank and approximately 120 wells in the gardens. The water for these gardens is taken out from the wells by means of Kapile, for which 4 oxen and 3 labourers have to work daily, and this will cost much. By installing pumps to these wells and by using electric power, we can take out water easily and quickly without much expense. We believe that we will make use of more electric power with these machines, and earn greater profit. All the gardeners and mill-owners will use electric power. Municipality is not

P.T.O.

providing enough power for lighting due to insufficiency. as the ~~efficiency~~ of the machines. ~~have gone down~~. More lights can be provided by means of Jog Electric Power.

If the power is transmitted along the pala, Badam-Road, it should be by the side of the road. There are many small villages for which electric power can be provided without much cost.

The above matter may be considered in the light of their merits and benefit etc. We request you to appoint an expert committee for further consideration of this. We assure our full co-operation to the committee.

Once again we request that the ~~prink~~ Prime Minister will kindly consider our request for transmission of power from Jog via Bankapur, Savanur and Lakmeswara.
